

We Deliver, You Deliver
On Time Every Time

An ISO 9001:2015 Certified Company

**Complete Internal Piping Solutions
for Residential, Commercial &
Industrial Needs**

Our Big Promise for Architects and Builders

- Fastest Delivery on Live Projects
- Durable Products
- 357+ Check Points
- Increase Building Life
- Reduce labour cost
- On-Time Delivery
- Indestructible
- Safe n Secure
- Long Lasting
- Increase Sustainability

Our Vision for Architects and Builders

At TMT Plus, we are dedicated to supporting the architectural and builder community with premium piping and electrical fitting solutions that prioritise quality, safety, and sustainability.

- Zero Delay Cost
- Sustainable Productivity
- Preserve Quality Standards

OUR VISION

Introduction to TMT Plus

Trusted Quality for Every Build

TMT Plus, a leading polymer product manufacturing company proudly rooted in Ambala, Haryana, has its presence in multiple cities. With over 64 years of legacy in excellence and innovation, TMT Plus today stands as a beacon of quality and reliability in the electrical and plumbing sector.

Our journey began as a small business, and through dedication and commitment to superior craftsmanship, we have transformed into a well-established organisation, trusted by customers across industries. At TMT Plus, we leverage advanced technologies in our state-of-the-art manufacturing facility to ensure our products meet and exceed market standards.

We specialise in high-quality PVC products that are designed for durability, efficiency, and safety, setting new benchmarks in the industry. Our unwavering commitment to providing innovative solutions at competitive prices has earned us an esteemed reputation among architects, engineers, and contractors alike.

Our range of products is designed with architects in mind, offering modern solutions that ensure reliability, ease of installation, and sustainability. With TMT Plus, you get a partner who understands the architectural vision and delivers the products needed to make that vision a reality.

Wooden Fittings Manufacture

TMT Plus's memorable journey of **65 years** has taken it from being a sole manufacturer of Wooden Electrical Fittings to a leading manufacturer of PVC products.

65 Years of Glorious History

OUR JOURNEY

PVC Construction Products

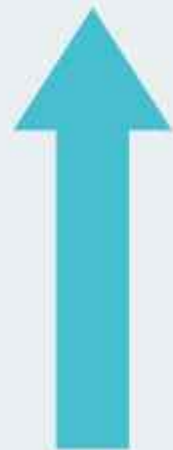

2002

Getting Started with KVIC Units

2006

Start of uPVC Conduit Manufacturing

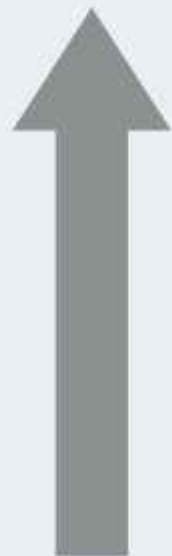

2008

Arrival of Mr. Arpan Goyal

2009

Water Tanks and Agricultural Pipes Were Added

2013

Establishment of TMT Polymers India Pvt. Ltd

2015

Production Capacity Increased from 1500 To 3000 Tons

2017

Metal Boxes and Accessories Were Added to the Portfolio

2020

Got Approval from Indian Railways and O.N.G.C.

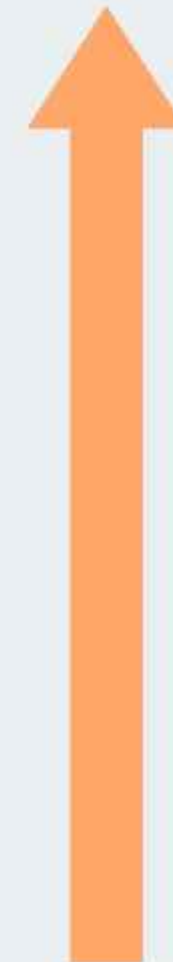

2022

A New Branch of Business was Expanded in Mohali.

2023

• CPVC pipes were launched.
• Dealer network increased by 40%.

2024

• MCB boxes and changeovers added to the new product line.
• Production capacity increased to 5000 tons.

2025

• Saathi Samreedhi Support Program
• Zed Certification Achieved

Testimonials

“

Partnering with TMT Plus grew my electrical/sanitary business from 50 customers to 200, boosted sales 10x, and provided top-notch marketing support.

Mr. RN Sharma

“

Initially, we thought TMT Plus prices to be high, but great quality won us over and our concerns were relieved, especially, now customers are also experiencing greater satisfaction as a result of TMT Plus' dedication to quality, and repeat orders are coming specifically for TMT Plus products.

Mr. Arun Kumar

”

Supporting On-Site Execution Excellence

Great architecture is defined not only by design intent, but by how accurately it is executed on site. **Saathi Samreedhi App** supports electricians and plumbers with product guidance and installation awareness.

It helps ensure specified systems are applied correctly, maintaining design integrity and long-term performance. Enabling better execution across residential, commercial, and infrastructure projects.

Architect Design → Right Products → Trained Installer → Better Execution

Enabled by Saathi Samreedhi App

How It Supports Your Projects

- Correct Installation
- Product Application Awareness
- Reduced Site Errors
- Long-Term Performance
- Design-to-Site Alignment

Our Commitment to Architects

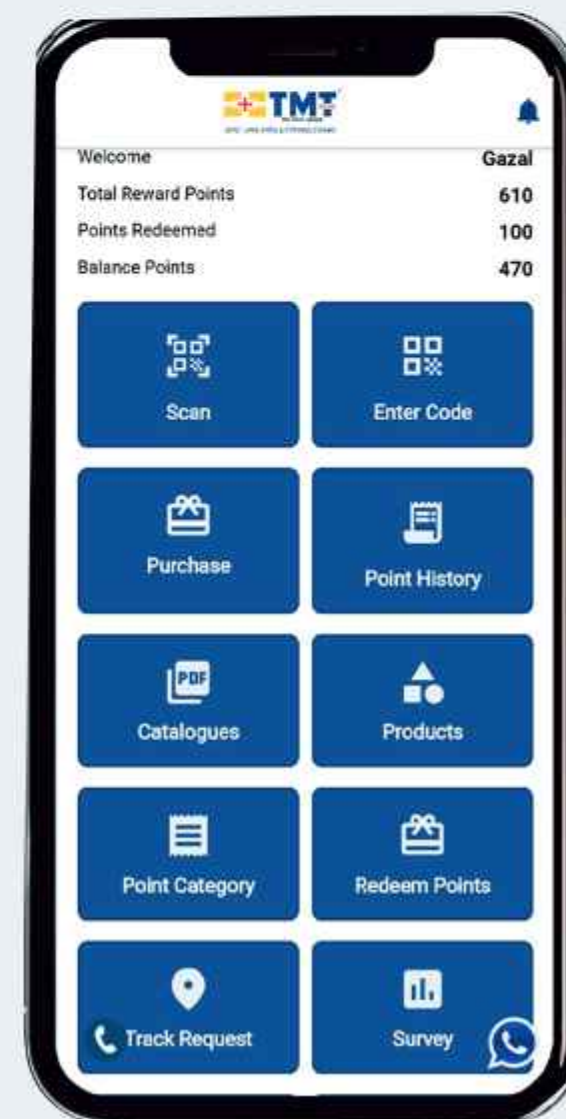

Enabling installers with the right knowledge to deliver design intent on ground.

TMT Plus

Distributor's **Success** Story with **10X Grow Sale**

”

By partnering with TMT Plus, I increased my customer base from 50 to over 200. My sales increased by 10 times. The best thing about TMT Plus has been timely delivery.

From starting out solely as an electrical trader, I now provide electrical and sanitary hardware products across Himachal Pradesh.

The marketing support and guidance by TMT Plus has further helped me take the lead in market trends. With more customers, my stock remains at a minimum level.

TMT Plus has an unmatched level of professionalism that will be valuable for anyone looking to expand their business and increase their profit margin.

Mr. RN Sharma

Our Comprehensive Range of Solutions

Water Tanks

TMT Plus stands as a premier provider of comprehensive water storage solutions. Our multi-layered water tanks are crafted from 100% virgin LLDPE (Linear Low-Density Polyethylene) PVC material using advanced RotoMould technology through a fully automated process. This ensures that the water tanks have exceptional strength and durability. As one of India's leading water storage tank manufacturers, TMT Plus is committed to delivering the finest water storage tanks to meet your needs.

Our Range of Water Tanks

3 LAYERS

CLASSIC

4 LAYERS

PUFF RAKSHAK

PUFF JUMBO

5 LAYERS

BASIC

CROWN

7 LAYERS

★ STAR

3 Layers Water Tank

TMT Plus 3-layer water tanks are built with triple polymer layers for superior impact strength. The middle layer, infused with carbon black, offers extra protection by blocking harmful UV rays, extending the tank's lifespan beyond the dual-layer design.

Here is what each layer contains:

- 1st Layer:** Layer for structural support and protection against external conditions
- 2nd Layer:** Carbon-black middle layer for protection against UV rays
- 3rd Layer:** Anti-bacterial layer

Features

- Light in Weight
- Weatherproof
- Keeps Water Fresh
- Consistent Wall Thickness

CLASSIC

4 Layers Water Tank

TMT Plus 4-layer water tank offers superior insulation, enhanced by a carbon black UV-protection layer. This feature helps maintain water temperature even when the outside temperature exceeds 45°C.

Here is what each layer contains:

- 1st Layer:** Protective shield layer
- 2nd Layer:** Carbon-black UV-protecting layer
- 3rd Layer:** Layer of Polyurethane Foam for double insulation
- 4th Layer:** Anti-bacterial layer

Features

- Rugged and lightweight design
- Weatherproof
- Keeps Water Fresh
- Non-toxic

PUFF RAKSHAK

PUFF JUMBO

5 Layers Water Tank

The **TMT Plus 5-layer water tank** is designed to keep water cool even in extreme climates, thanks to its advanced dual foam layer providing superior insulation. The top high-definition cover layer ensures complete protection against UV radiation.

Here is what each layer contains:

- 1st Layer:** Reflective shield layer
- 2nd Layer:** High-quality insulation foam layer
- 3rd Layer:** UV shielding layer
- 4th Layer:** Enhanced insulation foam layer
- 5th Layer:** Anti-microbial layer

Features

- Weatherproof
- Rugged Design
- Dual Foam Layer
- Leakproof

BASIC

CROWN

7 Layers Water Tank

TMT Plus 7-layer water tank stands out as a trusted name in multi-layered water storage solutions. Engineered with UV stabilisation, it effectively shields against harmful sun rays. The 7 layers work together to ensure anti-microbial and antioxidant protection, keeping water fresh, clean, and free from odours.

Here is what each layer contains:

- 1st Layer:** Reflective shield layer
- 2nd Layer:** Insulation foam layer
- 3rd Layer:** Black carbon layer
- 4th Layer:** High-strength layer
- 5th Layer:** Second insulation layer
- 6th Layer:** The barrier layer helps prevent the mitigation of harmful bacteria
- 7th Layer:** Antimicrobial layer

Features

- UV-stabilised
- Consistent Wall Thickness
- Odour-free Water
- Anti-bacterial Layers

★ STAR

CONDUIT PIPES

TMT Plus Conduit Pipes are engineered to provide robust protection against electrical shocks, effectively shielding cables from mechanical stress and abrasions that can compromise insulation integrity. Constructed from high-quality PVC resin, these pipes ensure enhanced safety and durability for power supply systems, making them the optimal solution for residential, industrial, and commercial wiring applications.

Our conduit pipes are available in a range of sizes from 19 mm to 63 mm, conforming to industry standards, thus allowing architects to seamlessly integrate them into their designs while ensuring long-lasting performance.

uPVC Conduit FRLS

Our **uPVC Conduit FRLS** features fire-retardant and low-smoke properties, providing robust protection for electrical wiring in buildings. When paired with conduit fittings, it serves as an insulating barrier, enhancing safety by preventing electrical hazards. In case of fire, it inhibits flame spread and reduces smoke emissions for safer evacuation.

Features

- U.V-stabilise
- Weatherproof
- Non-toxic
- Excellent Rigidity

FR Conduit Pipes

Flame-retardant Conduit Pipes feature a sturdy design, ideal for industrial, commercial, and everyday applications. Made from PVC resin with enhanced properties, these conduits offer resistance to fire and magnetic interference, ensuring safe and efficient current flow while minimising safety risks.

Features

- Strong and Durable
- Low Thermal Expansion
- Non-Combustible
- Smooth Inner Surface

Bends and Fittings

In an electrical system, wiring conduits safeguard cables and power transmission from external factors like harsh weather, accidental damage, and threats posed by rodents or insects. However, practical installation requires adapting to structural corners and obstacles by bending the conduit to fit specific dimensions. 3D and 5D bends provide smoother, more gradual curves compared to sharp angles, allowing for easier and faster wire placement.

Features

- Corrosion-resistant.
- Fire Resistance
- Excellent Elasticity and Flexibility
- Insulation Provides Safety from Shocks

PVC Junction Box

The **PVC Junction Box** serves as a fundamental electrical device designed to safeguard the connections of multiple wires or circuit cables. Acting as a central hub, it facilitates the organisation and routing of various electrical wires, allowing them to be directed through conduits or other fittings, whether in the same or different paths.

Features

- Durable and Dustproof
- Waterproof and Weatherproof
- Shockproof
- Non-toxic

Metal Boxes and Accessories

TMT Plus Metal Boxes and Accessories are ideal for electrical installations in both residential and commercial construction projects. As the leading manufacturer of metal boxes and accessories, TMT Plus demonstrates its dedication to quality and excellence by adhering to industry standards and regulations.

Features

- Modularity and Expansion
- Accessibility

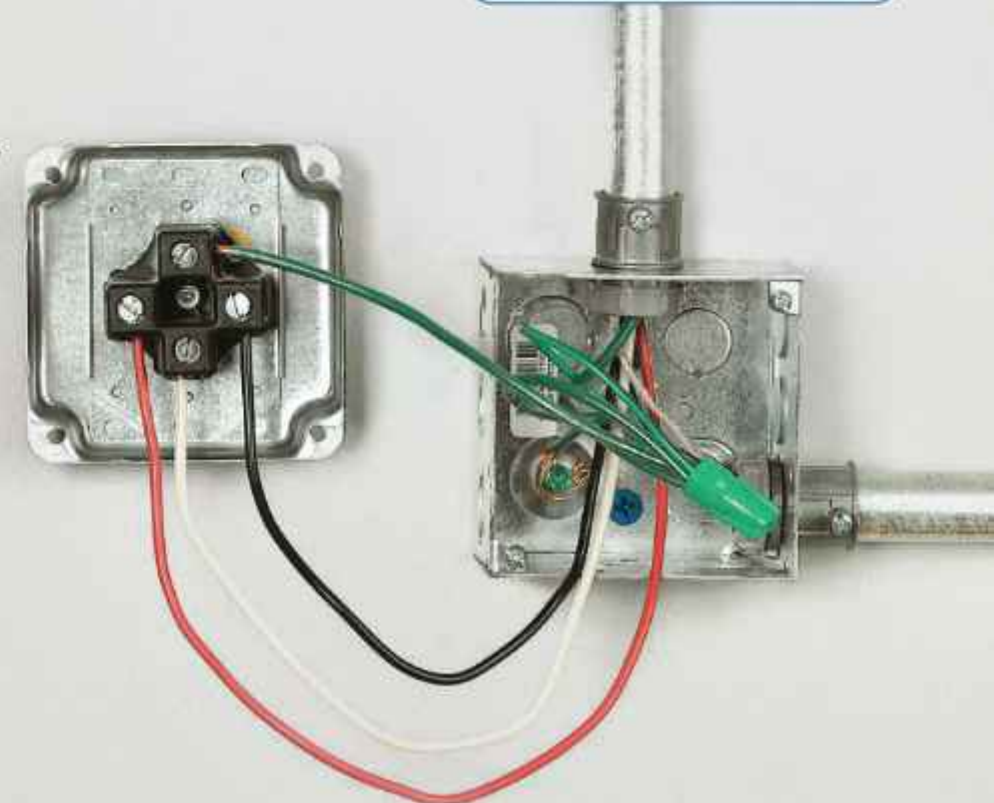

Junction Box

TMT Plus Metal Junction Boxes are essential electrical enclosures designed to safeguard wires and components from damage while facilitating easy wire connections. Available in various sizes and shapes, these junction boxes are crafted from durable metal or PVC to cater to diverse applications. They are indispensable tools for electricians and professionals seeking to enhance the safety and reliability of electrical installations.

Features

- Protection from Damage
- Convenient Wire Connections

Concealed Boxes

TMT Plus Concealed Boxes are expertly crafted electrical enclosures designed for discreet installation. Ideal for both residential and commercial construction, these boxes safeguard electrical wiring and components from potential damage. Made from premium materials, including PVC and metal, our concealed boxes come in various sizes and shapes to cater to diverse application needs.

Features

- Durability
- Safety

Fan Boxes

TMT Plus Fan Boxes offer a versatile solution for both commercial and residential applications. Available in various sizes, their modular design allows for easy installation and maintenance. Constructed from high-quality materials, they provide exceptional durability, optimal airflow, and energy efficiency, making them an ideal choice for cost-conscious homeowners and businesses.

Features

- Durable construction
- Energy efficiency

Modular Boxes

In indoor and industrial environments, protecting valuable items from dirt and dust is crucial. TMT Plus's 19 Gauge **Modular Electric Boxes**, constructed from high-quality 1.0/1.2 mm thick CRC sheet, offer exceptional durability and weather resistance. Their modular design allows for customisation, making them suitable for diverse architectural applications and environments.

Features

- Dirt and Dust Resistance
- Powder-Coated Finish

uPVC Pipes and Fittings

TMT Plus uPVC Pipes and Fittings embody the essence of efficiency and durability. When considering technical specifications and cost-effectiveness, our uPVC solutions surpass traditional GI pipes. In the realm of potable water supply, TMT Plus uPVC pipes offer a reliable system that ensures easy installation.

Features

- Lead-free
- Corrosion-free
- Hygienic

uPVC SWR Pipes and Fittings

TMT Plus uPVC SWR (Soil, Waste, Rainwater) Pipes and Fittings provide a durable and reliable drainage solution for residential, industrial, and commercial applications. Designed to perform seamlessly in both standard and demanding conditions, they resist clogging to maintain a bacteria-free environment, ensuring safety and hygiene. Rust-proof and rodent-resistant, these pipes offer long-lasting, maintenance-free performance, making them the ideal choice for all your plumbing needs.

Features

- Easy to handle and carried in bulk.
- Able to handle the high flow of liquids.
- Easy to install.

uPVC Plumbing Pipes

Upgrade your plumbing with **TMT Plus uPVC Plumbing Pipes**, built to international standards for reliable year-round performance. With easy installation and customisable options, our pipes handle high-pressure hot and cold liquids without leaks or damage. Perfect for kitchens, wash basins, washrooms, and drainage systems, they offer a seamless solution for residential and commercial applications. Whether it's a new installation or an upgrade, our pipes deliver consistent performance and reliability you can count on.

Features

- Durable
- High Strength and Flexibility
- Do Not Support Combustion

cPVC Pipes and Fittings

TMT Plus cPVC Pipes and Fittings are designed to withstand higher temperatures, making them ideal for hot water applications in residential and industrial settings. As a leading manufacturer, we use premium materials to ensure top plumbing performance. Adhering to IS 15778 and ASTM D 2846 standards, our cPVC pipes are available in SDR 11, SDR 13.5, SCH 40, and SCH 80, with fittings in SDR 11, and sizes ranging from 20mm to 50mm.

Features

- High Temperature Resistance
- Corrosion Resistance
- Chemical Resistance
- Longevity

UNMATCHED RELIABILITY
UNBEATABLE SAFETY!

Casing & Capping

Ensuring the integrity and safety of electrical systems starts with reliable **casing and capping** of wires. Our uPVC Casing and Capping provide robust protection for both residential and commercial properties. Designed to meet customised specifications, they are built to last and are certified to meet world-class standards, ensuring peace of mind for every installation.

Features

- Double Locking
- Cost-effective
- Heat Resistant

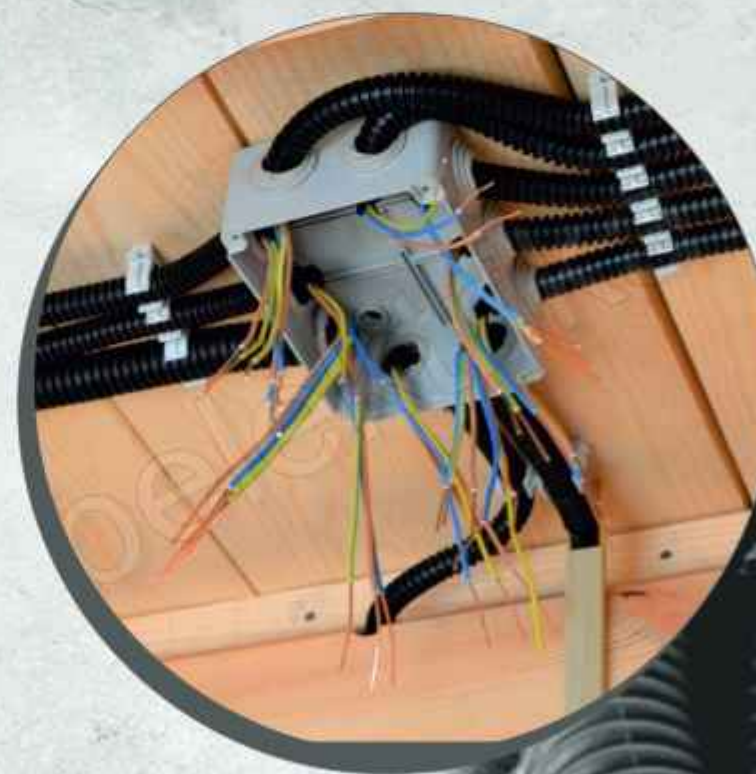

Corrugated Pipes

TMT Plus Corrugated Pipes are essential for electrical systems and communication networks, offering flexibility, durability, and protection against moisture and abrasion. Ideal for optic fibre installations, they ensure reliable connectivity across industries. Available in vibrant colours for easy identification, our eco-friendly pipes meet global standards and combine innovation with quality. TMT Plus sets new benchmarks in reliability and sustainability, making our pipes perfect for construction projects focused on a greener future.

Features

- Overcurrent Protection
- Reliability
- Automatic Switching

MCB Boxes and Changeovers

An **MCB Box**, or Miniature Circuit Breaker Box, is a vital electrical enclosure that houses circuit breakers, protecting electrical circuits from overcurrents and short circuits. Changeover switches facilitate seamless transitions between power sources, ensuring an uninterrupted power supply during maintenance or outages. Widely utilised in both residential and industrial applications, MCB boxes offer essential circuit protection and distribution. **Changeover** switches are especially crucial in environments like hospitals and telecommunications, where a continuous power supply is critical.

Features

- Quality Control
- Low Maintenance
- Durable Quality

MCB boxes and Changeovers

TMT Products are Made with Virgin Material

PVC products manufactured by TMT Plus are one of a kind. They are made using **virgin material** that is food-grade and sustainable. Virgin material refers to a raw material that has never been used or recycled before and is in its pure, original form. This means that our products will have the best features, deliver the most optimal performance under any conditions, and remain extremely durable.

Sustainability

TMT Plus products are crafted with a single vision: **sustainability**. From our multi-layered water tanks to electrical conduit pipes and more, each product is manufactured using high-quality PVC to ensure durability and long-term cost-effectiveness

WHY CHOOSE TMT PLUS?

- Cost-Effective Solutions
- Easy Installation
- Safety and Compliance

- ▶ Wide dealer network covering **12 states & 355+ cities**
- ▶ **98.2% on-time** delivery of our products
- ▶ **357+ check points** to ensure consistent quality
- ▶ Products used in **7 countries**
